Projects

Cybersecurity Tools (Python)

Developed multiple cybersecurity tools to perform scanning and detection tasks.chauhanprashant07

Jan-March 2026

- Phishing URL Detector – Detects malicious URLs.
- Network Scanner – Scans for open ports and active hosts.
- Built using Python, Socket Programming, and Requests.

JARVIS AI Assistant

Developed a voice-controlled AI assistant that can perform system tasks and provide intelligent responses.

July-Sep 2025

- Voice recognition and command execution.
- Can open websites, play music, fetch data, and more.
- Built using Python, Speech Recognition, pyttsx3, and APIs.

AI-Powered Career Prep Platform

Developed an integrated web application to assist job seekers in resume optimization and interview preparation.

Jan-Feb 2025

- Resume Analyzer: Uses NLP and Scikit-learn to parse data and provide actionable feedback for higher ATS scores.
- Mock Interviewer: Integrates OpenAI API to generate role-specific questions and deliver real-time, constructive feedback.

Education

Bachelor of Technology in Computer Science & Engineering AKTU University

2023-2027

- CGPA: 7.2
- Participated in national coding competitions

Certifications & Volunteer Work

- Python Programming – Sololearn
- Cybersecurity Essentials – Cisco Networking Academy
- AI Introduction – IBM SkillsBuild

Skills

- Languages: C, C++, Java, Python, JavaScript
- Web: React.js, Node.js, Express, MongoDB
- AI/Cyber: NLP, Scikit-learn, Linux, Nmap, Wireshark
- Tools: Git, GitHub, VS Code, Postman, Vercel

ACHIEVEMENTS

- Coding: Solved 300+ LeetCode problems.
- GitHub: 500+ active contributions.
- Awards: Top 10 in College Coding Competition.
- Events: Participant, Smart India Hackathon 2026.
- Projects: Developed 10+ real-world applications.
